

Paper Recycling!

- **Did you know that paper comprises about 38% of our garbage, more than double any other type of waste?**
- To create 1 ton of uncoated virgin printing and office paper it would take approximately 24 trees!
- Today, recycled paper supplies over 38% of the total fiber needed to produce our country's paper products.
- **54.5% of all paper and paperboard products are being recycled in the US according to a 2007 EPA study!**
